Dear California Driver:

California is fortunate to have one of the nation's best transportation systems and, at the state level, we are making an all-out effort to improve traffic safety on our streets and highways.

Since 1967, our Office of Traffic Safety has administered $170 million in highway safety funds for a variety of safety programs which have served to reduce the severity and magnitude of traffic accidents.

In addition, over the past three years, my administration has increased the number of state law enforcement personnel, including California Highway Patrol, by nearly thirty percent.

California's child safety seat law, which took effect in 1983, is also beginning to show encouraging results in protecting the lives of our young children. Seatbelts save lives and reduce the severity of injuries which occur as a result of traffic mishaps. Recognizing this fact, the state will require all passengers to wear safety belts beginning in 1986.

As this annual report on traffic accidents illustrates, we must continue our efforts to improve safety on our streets and highways. While the rates of death and injuries per miles driven were down in 1984, the total number of fatal accidents was up, with 4,999 men, women and children killed in traffic accidents. Regrettably, California has not had a day without a traffic death since March 1968.

Part of the overall casualty increases can be attributed to a sharp upswing in alcohol-related death and injuries. This is disappointing, particularly in light of the increased public awareness and new laws against drinking drivers which have been enacted in recent years.

Reducing traffic accidents and injuries in our state is a goal we can achieve, but only through cooperation, teamwork and common sense. Each of us must demonstrate responsible driving behavior in order to preserve our state's most precious resource -- the health and safety of our people.

Thank you for your help in achieving this important goal.

Most cordially,

George Deukmejian

PREFACE

The 1984 Annual Report of Fatal and Injury Motor Vehicle Traffic Accidents was completed as a result of motor vehicle traffic accident reports received from local police and sheriff jurisdictions and from California Highway Patrol field offices.

All fatal and injury accidents which occurred on California's state highways and all other roadways are reflected in this report, presuming that all accident reports were received by the department and processed.

Property Damage Only (PDO) accidents are only included in Section 8. However, the degree of completeness is in question since not all agencies report all their PDO accidents, PDO's are indicators of the volume of accident occurrences and are not exact statistics.

This report is prepared in accordance with Section 2408 of the Califonria Vehicle Code. The cooperation of all traffic law enforcement agencies is highly appreciated.

Copies of the report can be obtained from Staff Services Section, California Highway Patrol, Post Office Box 898, Sacramento, CA 95804, by payment of $3.50, which includes sales tax..

1984 California Quick Accident Facts

In 1984, California had a total of 491,449 traffic accidents, 4,497 fatal, 208,419 injury and 278,533 property damage only.

A traffic accident was reported every one minute and four seconds.

One person was killed every one hour and 45 minutes as a result of a traffic accident.

One person was injured every 1 minute and 42 seconds as a result of a traffic accident.

Children under the age of 15 accounted for 33.2% of pedestrian victims and 41.0% of bicycle victims (victims killed and injured).

For each person killed there were 62 persons injured.

Speed was indicated as the Primary Collision Factor in 20.5% of the fatal and injury accidents.

In the last five years 1,480,064 persons have been killed and injured in California traffic accidents. This is an average of 296,013 per year. During the previous five-year period, 1,431,659 persons were killed and injured for an average of 286,332 per year.

Of the licensed drivers in California, 31.3% were under 30 years of age; however, they comprise 47.9% of all drivers in fatal and injury accidents.

One out of every 5,125 persons living in California was killed in a traffic accident; one out of every 83 persons was injured; and one out of every 46 licensed drivers was involved in a fatal or injury traffic accident.

As a result of the 4,497 fatal accidents, 4,999 persons were killed for an average of 1.1 deaths per fatal accident.

There were 2.6 persons killed and 157.8 persons injured for every 100 million vehicle miles of travel. (These are more commonly known as the mileage death and mileage injury rates.)

Hit-and-run was indicated in 8.7% of the fatal and injury accidents.

1 ten year summaries

In California, the mileage death rate has continued to decline from 3.4 in 1980 to 2.6 in 1984. This decline is comparable to the national death rates as well.

Fatal accidents are the highest since 1981, while injury accidents continue to increase significantly since 1976.

section 8 location

Table 8a presents accident information for all incorporated cities separately. The accidents presented in this section were the result of traffic accident reports received from local police and sheriff jurisdictions and from California Highway Patrol field offices. Each law enforcement jurisdiction will not appear separately. Data is presented by accident location. Unincorporated locations appear as unincorporated state highways and county roadways. Cities and the unincorporated areas are combined for the county totals.

Presented for the first time by county are Tables 8K and 8L, accidents and victims where the primary collision factor was determined as Driving Under the Influence of Alcohol (DUI/PCF).
